ELSEVIER

Physica B 265 (1999) 302–303

PHYSICA B

Subject Index

Absorption spectra 109
Alkali hydrides 87
AlN 1
Ammonium halides 92
Amorphization 105, 121
Amorphous alloys 291
Annealing 295
Anthracene derivatives 199
Antiferromagnetism 60
Anvil cell 258

BCS Model 142
Bechgaard salts 164
Bulk modulus 208

Calibrants 268
Carbon clusters 223
Charge transfer 16, 181
Charge transfer spectroscopy 176
Circular dichroism 203
Combustion synthesis 1
Compressed fluids 31
Compressibility 282
Conducting polymers 154
Configurational inversion 203
Coordination compounds 203
Copper oxide 181
Critical point 121
Critical temperature 128
Crystal field splitting 186
Crystal growth 1
CsC_{60} 234
$CuCl_6$ 176
$CuMoO_4$ 181

DAC 254
Density 282, 287
Diffusion 223, 295
Doping 128, 136, 295
Double exchange 191
$Dy_3Al_5O_{12}$ 277

Elastic properties 230
Electrical resistance 291
Electron correlations 170
Electronic structure 87, 160
Electron–phonon models 164
Equation of states 113
Exact diagonalization method 60
EXAFS 72
Excess volume 287

Fermi resonance 54
Fermi surface 170
Fullerene and fullerene derivatives 214
Fullerene and its derivatives 208, 230
Fullerides 234

Gallium nitride 295
GaN 1
Graphite–diamond transition 223

Hall effect 263
Halogens 79
High pressure 49, 64, 87, 92, 128, 154, 181, 203, 214, 258, 272
High-pressure apparatus 263
High-pressure CO_2 54
High-pressure Raman spectroscopy 277
High-T_c superconductivity 136, 142
Hubbard hamiltonian 142
Hydrogen 6, 16, 31
Hydrogen bonds 83, 97, 113
Hydrogen bromide 101
Hydrogen electroconductivity 6
Hydrostatic pressure 109, 176, 291

Ices 24, 113, 121
Implantation 295
Infrared spectroscopy 39, 49, 72, 146

InN 1
Insulator–metal transition 105, 170
Intermolecular interactions 49
Iodine 64, 79
Ionic structures 16

Jahn–Teller effect 176

$KBr : Pb^{2+}$ 109
Kinetics 223

Lattice dynamics 195
Layered cuprates 136
Light scattering 272
Liquid structure 272

Magnetism 191
Magneto-resistance 263
Measurement 263, 268
Melting 12, 64
Metallization 16, 72
Metal–insulator transition 79
Metrology 239, 246
$MnCl_6^{4-}$ 186
Mn–Cl distance 186
Molecular dissociation 31, 83
Molecular dynamics 101
Molecular interaction 39
Molecular solids 24, 97, 105

Neutron diffraction 92
Neutron scattering 258
NH_4MnCl_3 186

One-dimensional crystals 199
One-dimensional metals 160
Optical absorption spectra 186
Order parameter 79
Organic conductors 170
Organic superconductors 195
Oxygen 49
Oxygen in one-dimensional micropores 60

Pairing 164
Perovskites 146, 176, 186
Phase diagram 97, 113, 121, 142
Phase transitions 6, 12, 64, 92, 199, 272
Phonons 150
Photoemission 160
Piezochromism 181
Polarons 146, 150
Polymeric fullerenes and fullerene derivatives 208
Polymeric fullerides and fullerite derivatives 234
Polypyrrole 154
Precision 268
Pressure 239, 268, 282
Pressure dependence 186
Pressure effects 136, 142
Pressure standards 246

Raman spectroscopy 39, 54, 83, 97, 214, 234
Rare earth garnets 277
$Re_3Al_5O_{12}$ 277

Sensors 239, 246
Shock compression 6
Solid halogens 24
Solid hydrogen 12, 39
Solid nitrogen 24
Spectrometer 258
Speed of sound 282
Spin-density-wave 164
SQUID 254
Structural phase transition 101
Superconducting transition 254
Superconductivity 128, 150, 170
Superexchange 191

$Tb_3Al_5O_{12}$ 277
Ternary mixture 287
Transducer 239, 246
Transport properties 191
Two-band Hubbard model 60

Variable range hopping model 154
Vibrating coil magnetometer 254
Vibrational spectroscopy 54
